

FROM THE EDITOR.....

Basis of a nation is the land on which it had developed and thrived. When the unity and the integrity of thus land are challenged, it is the duty and responsibility of the whole nation to stand up against the threat. However, as practiced throughout the human history, nations delegate this huge task to a few in the security forces who are bound by duty to even make the ultimate sacrifice in the name of the land. Invariably such few are to be revered and idolized for gratitude as well as to be made an example for the continued well being of the nation.

It is with the above intention that “Sanda Hiru Seya” is being built, to become an eternal monument to the unimaginable sacrifices made by the nation and the security forces for the unity and integrity of this land called Sri Lanka. As it has been always, it is the Engineers who are creating this edifice depicting the Buddhist heritage of the country and a graphic representation of achieving enlightenment.
